SHAHED AL RINA

Web Developer | PHP & Laravel

shahedrina48@gmail.com | +963 946 591 255 | Aleppo, Syria | github.com/ShahedRina

PROFESSIONAL SUMMARY

Web developer and fourth-year Informatics Engineering student at the University of Aleppo, specializing in back-end development with PHP and Laravel. Built 5+ database-driven web applications, including management and reservation systems, with hands-on experience in CRUD operations, authentication and relational database design. Looking for a junior developer role or internship to contribute to real-world products and grow within a professional team.

TECHNICAL SKILLS

Back-End: PHP, Laravel (MVC, Eloquent ORM, Blade, Authentication), C#
Front-End: HTML5, CSS3, JavaScript, Bootstrap
Database: MySQL, Relational Database Design, SQL
Tools: Git, GitHub, Microsoft Excel (Advanced)

EXPERIENCE

Freelance Web Developer 2024 – 2025
Self-employed Aleppo, Syria

- Developed 5+ websites and web-based management systems using PHP, Laravel and MySQL.
- Designed relational database schemas and implemented full CRUD functionality across projects.
- Built admin dashboards and user authentication for management and reservation systems.
- Delivered projects both independently and as part of a team, from requirements to deployment.

Data Entry & Reports Specialist 2022 – 2023
Al Wasit Library Aleppo, Syria

- Entered, organized and maintained accurate records; prepared periodic reports using Microsoft Excel.

SELECTED PROJECTS

- **Flight Management & Reservation System** (Laravel, MySQL) – System for managing flights and booking reservations in Syria, including flight, airline and passenger data.
- **Hotel Management System** (Laravel, MySQL) – Web application for managing rooms, guests and hotel-related information.
- **School System** (Laravel, Blade) – Management system for school data such as students, classes and records.
- **Invoice System** (Laravel, Blade) – Application for creating, tracking and managing invoices.
- **Smart Pharmacy** (PHP, Laravel) – Pharmacy management web application for medicines and orders.
- **Posts Management Website** (Laravel, MySQL) – Platform for creating and managing posts with full CRUD operations.
- **Movie Website** (PHP) – Website for browsing movies and their details.
